The energy stored in the coal beds har rightly been referred back to the sun, and it is no doubt to the same source that we should ultimately attribute the heat developed at great depths below the surface of the earth. While it is believed that no practical attempts to utilize this subterranean heat have yet been carried into effect, there appears to be no good reason why the atpears to be no good reason why the attempt should not be made, especially in volcanic regions, where quite high temperatures should be revealed at moderate depths.

IN MEMORIAM.

In the city of Richmond, July 12th, 1897, the spirit of Susan, the beloved daughter of Julia Ann, and the late James Edward Braxton, took its flight to the God who gave it.

Kind and amiable in disposition, she was beloved by all.

She has gone from us; a seat is vacant in her home; but the remem-

brance of her will live forever in our earts. Though an invalid she resigned her-self to the will of the Master and was anxious to go and live with Him. Oircumference.
